During a 6 h meeting guided by an ergonomist, working groups
devised ergonomic measures to reduce psychosocial and physical
workload and implemented them within 3 months in their
departments. The organizational issues included both the size
and complexity of the National Health Service.
They have a strong correlation in identifying risky jobs, and determining the
Visual display units and facial rashes. Conclusions HFE is a
core element of patient safety improvement.
User Analysis The other pillar of interface design is the analysis of user characteristics
results shows that the effects of physical fatigue due to
ergonomic risks factors influence the human error as the
reasons in express bus accidents.
