These are usually 6V batteries wired in series to make up 24VDC for a power-line. From 1 January all dwellings sold, leased or where a lease is renewed must comply as for new dwellings. Batteries are used either as sole or as backup power for residential smoke detectors.

It should also be positioned in a fairly central location because if the system can be at building security headquarters, adjacent to a telephone switchboard or in a maintenance office – whichever location offers maximum coverage. Property loss can be reduced and downtime for the operation minimized through early detection because control efforts are started while the fire is still small.
