The many methods of religious coping: Process of forgoing life-sustaining treatment in a university hospital: Availability of these documents assists the intensivist in guiding families through the intensive care experience. This article has been cited by other articles in PMC. When the patient is being mechanically ventilated, the critical care team should address withdrawal when the following three scenarios present themselves: The Maintenance of Life Frances Norwood. A prospective cohort study among terminally ill cancer patients. However, one of these topics can be discussed in depth in a separate chapter, which we have done in various other works of public knowledge 4 - 8 although in this text we will focus only on the question of the dignity of life and death in the ICU to highlight the point we aim to discuss in depth. End-of-life issues in intensive care units:
