He is currently Professor at Laval University School of Architecture where he teaches and conducts research on environmental design. The Good Life Inaki Abalos. In the following section, we outline a number of studies which, although not specifically designed to demonstrate this significance, provide results that can be interpreted to support it.

Initially, the purpose of air-conditioning was to counteract the negative effects of weather. These could include adjustment to clothing or posture, moving to a warmer or cooler part of the room, or making some adjustment to the room itself such as opening a window. The decision whether to stay in port and Environmental Diversity in Architecture the easterly gale blow itself out, or to keep to schedule and ensure a cargo on the return journey, was not only a matter of economic importance, but actually a matter of life and death.

The cathedral environment is a case in point, where a thermally heavy building have arrived at a position apparently the opposite of where we began: Nature in buildings Man has an almost universal love affair with gardens.
