I was lucky enough to be at the beginning of this story, with early experiences on the 'birth project' of Extreme Programming and a co-author of the Manifesto for Agile Software Development. Having the same person responsible for both the what vision and the how implementation also stifles innovation. Kanstantsin Baturytski added it Mar 31, I was lucky enough to be at the beginning of this story, with early experiences ThoughtWorks started using agile techniques in and we've since successfully used them on our projects world-wide. So I am probably tainted by my experiences, but the notion of one person in charge of the team fills me with dread. This is one of the reasons that I still think that Extreme Programming is the most valuable of the named agile methods as a core and starting point. This book is not yet featured on Listopia. Give them the environment and support saw Agile as a method for empowering the teams and taking away abusive power from lone leaders.
